

Doug Walker

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

Everyone enjoyed the visual aids (except Zach, obviously), because they definitely helped most of us comprehend your operations.

What things about the presentation did you dislike (what parts lost your interest)?

Admittedly, hearing the word "box" repeatedly was a mite grating, so try mixing it up with "container," or "capsule," or "bin" every now and then.

What part of the presentation were you confused about or wish for more clarification?

Nada

Any other comments about the presentation?

Thnx

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

Visual aids

What things about the presentation did you dislike (what parts lost your interest)?

Conclusion. Mat stood idle confusingly by himself in the beginning before writing on the board.

What part of the presentation were you confused about or wish for more clarification?

Any other comments about the presentation?

Great presentation!

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

Visual Aid

What things about the presentation did you dislike (what parts lost your interest)?

Repetition of term - 'box' but is that avoidable?

What part of the presentation were you confused about or wish for more clarification?

API structure relevant to you vs how it typically is

Any other comments about the presentation?

Good job

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

Good visuals to present information

What things about the presentation did you dislike (what parts lost your interest)?

Jargon being presented too quickly
without much repetition to remind
audience.

(ISO, Int. Standards Org., IEC, Int. Standards Org.)

What part of the presentation were you confused about or wish for more clarification?

Blame in Boxes - needs more clarification

Any other comments about the presentation?

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

Very clear, thorough. Breakdown
of all ~~difficult~~ concepts was very
complete

What things about the presentation did you dislike (what parts lost your interest)?

kind of goofy

What part of the presentation were you confused about or wish for more clarification?

~~task~~ The re-packaging portion seemed
a little bit rushed, and I
was not sure how confident
you were re: the consistency

Any other comments about the presentation?

Very effective, just goofy

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

The props kept me engaged and entertained while learning!

What things about the presentation did you dislike (what parts lost your interest)?

Better flow especially between
ITs → Box explanation.

What part of the presentation were you confused about or wish for more clarification?

All said and done got the
info across

Any other comments about the presentation?

Nope

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

I like the visual aids (taps, Diffs).
It helped break-up a list of terms and
made a story out of it.

What things about the presentation did you dislike (what parts lost your interest)?

The boxes

What part of the presentation were you confused about or wish for more clarification?

The boxes → what container held what maybe needed
a little more time.

Any other comments about the presentation?

- Face the audience when speaking.
- Don't say "I think that's how it works"

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

Physical simulation using things

What things about the presentation did you dislike (what parts lost your interest)?

Missing some motivations prior to presentations

What part of the presentation were you confused about or wish for more clarification?

TS part — probably because it didn't have much intro,

Any other comments about the presentation?

Overall — very nice! #
Could use stronger opening & closing.

It's Runtime Technical Presentation

What things about the presentation did you enjoy (what kept your interest)?

The examples and lile heartedness
in the presentation was interesting and
enjoyable.

What things about the presentation did you dislike (what parts lost your interest)?

Some of the speakers were talking too
quickly and the concepts were glossed
over.

What part of the presentation were you confused about or wish for more clarification?

I wish the boxes were slightly more
covered, they still confuse me.

Any other comments about the presentation?

Good - job, great job trying
something new
